For those of you who have issues installing Praat and SEPALE on Mac, here are some updated instructions:
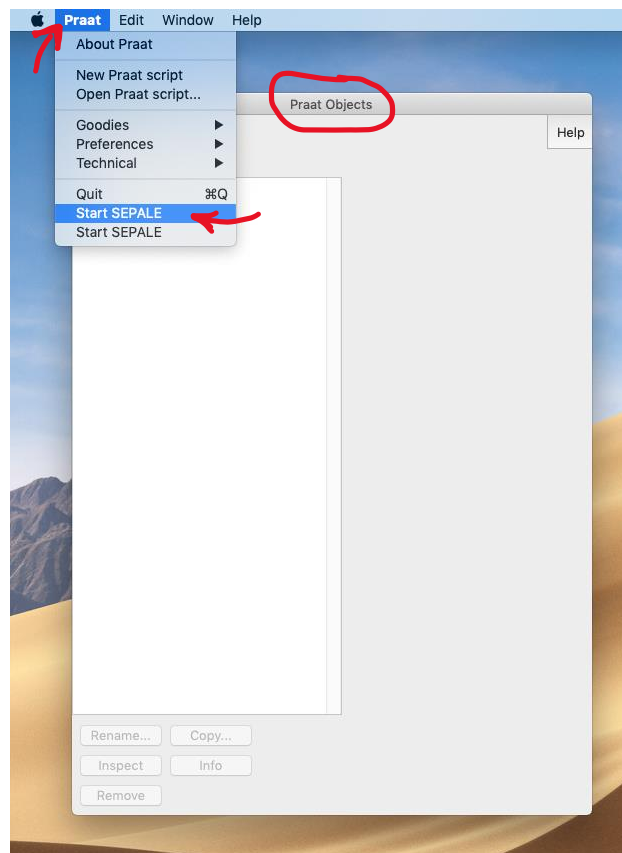

1) Follow the links on Moodle to download Praat (do it first!) and the folder called plugin_SEPALE. Within that folder, click on "setup.praat." Praat will automatically open 3 windows: Praat Objects, Praat Pictures and one called Script followed by the path of the file like "/Users/.../.../plugin_SEPALE" etc. In this third Script window, click on Run in the bar at the top, then Run again in the drop-down menu. See screenshot 1 "Run Script."

Screenshot 1 – Run Script

2) Nothing will happen but it should have worked behind the scenes. You can now close this window.

3) Then, go to the Praat Objects window -- You will see in the bar at the top the option "Praat" - click on it and you should now see "Start SEPALE" as an option in the drop down menu. See screenshot 2 "Start SEPALE."

Screenshot 2 – Start SEPALE

Now that it is installed, you do not have to repeat step 1 or 2 again, you should always have this option every time you open Praat. Try closing Praat and clicking on the icon to open it up again to make sure the option to "start SEPALE" is still there. If it is, congratulations, you did it! Now all you have to do is open Praat and click on "Start SEPALE" every week to complete the exercises.
